## Brief Instructions for Integrating DFP with HD Relay Players

Login to manage.hdrelay.com

The screenshot shows the HD RELAY Advanced Streaming interface. The top navigation bar includes the HD RELAY logo, 'Cameras', 'Clients', and 'Service Tools'. The user 'kevin@hdrelay.com' is logged in. The 'CAMERAS' section is active, displaying a table with columns: Cam, Info, Status, and Tools viewer. The first row shows a camera named 'janelas.tv.br - Canal 3' with details: Model: Axis Q6045-E, Storage: 100 Gb, IP: santosc3.dyndns.org, HTTP port: 8083, RTSP port: 8084, username: root, password: long1975, and Server: Toronto. The 'Players' dropdown menu is circled in red, showing '- Select a player -'. The 'Tools viewer' column lists various actions: Test connection, Settings, Usage, Go to Camera, Reset, Availability, Recordings, Time Elapsed Capture, Video Encode Tasks, and Notes.

Select Your Player that you want to add DFP to.

Scroll down past the streaming player and choose "Edit Web Player."

The screenshot shows the 'HTML Code' section of the HD RELAY interface. It contains a pre-formatted HTML code block for integrating a web player. The code includes comments and script tags for loading the HD RELAY player. Below the code block, there are two buttons: 'List share records' and 'Edit Web Player'. The 'Edit Web Player' button is circled in red.

```
<!-- Required libraries to be included preferentially in page head. -->
<script src="//s7.addthis.com/js/300/addthis_widget.js#pubid= " ></script>
<script src="//manage.hdrelay.com/js/hdrelay.js" type="text/javascript"></script>

<!-- Div that is going to hold web player. Size set to keep player space before load. -->
<div style="width: 800px; height: 450px;" id="webcam_holder"></div>

<!-- Code to show web player. Must go after div tag. -->
<script type="text/javascript">
  HDRelay.create({target:'webcam_holder',id:'
</script>
```

List share records Edit Web Player

Click on "Continue."

Scroll down until you reach the section called "Intro" and then click the check box next to the title "Intro."

Set your "Time to Skip" in seconds. For this example, a viewer can skip the DFP Video Ad after 5 seconds.

---

Block different domain framing ☐
